Software Developer

Front-end developer with strong experience in modern web technologies, including JavaScript, TypeScript, React, Svelte, Vue, and LitElement. Skilled in building scalable and efficient user interfaces, with a strong focus on design systems, consistency, and performance. Passionate about UI/UX, ensuring seamless and intuitive user experiences across complex applications. Experienced in enterprise and high-demand environments, including SAPUI5 and WordPress, delivering robust, well-integrated solutions.

HIGHLIGHTS OF QUALIFICATIONS

- 5+ years of front-end development experience building scalable, high-performance web applications.
- Strong expertise in React, Vue, Svelte, and design system development using Lit.
- Experience building reusable component libraries to improve efficiency and consistency.
- Solid UI/UX background focused on intuitive, accessible, and user-centered interfaces.
- Experience in enterprise environments using SAPUI5 and SAP Fiori.
- Proven ability to mentor junior developers and ensure code quality.
- Experience working in Agile environments and cross-functional teams.

TECHNICAL SKILLS

- **Languages & Core Technologies**
HTML5, CSS3, Sass, JavaScript, TypeScript
- **Frameworks & Libraries**
React, Svelte, Vue, LitElement, SAPUI5, Angular
- **Back-end & Platforms**
Node.js, WordPress
- **Design & UX Tools**
Figma, Adobe XD, Adobe Photoshop

PROFESSIONAL EXPERIENCE

Frontend Developer

May 2025 - Current

Trillia, Brazil, Remote

- Directed the evolution of a corporate Design System using Lit, standardizing reusable components and reducing UI inconsistencies by 40%.
- Built and standardized 53 reusable components, enabling product teams to scale faster and cut repetitive coding efforts, which reduced time-to-market; applied principles relevant to React.js component design.
- Developed reusable components that accelerate product teams' workflows while emphasizing modularity and performance, aligning with React's component-based architecture.
- Enhanced Vue.js projects by delivering responsive and performance-oriented solutions, improving application speed by 25% and enhancing user satisfaction, with transferable expertise in React-driven UI development.
- Facilitated weekly workshops and Q&A sessions with 100+ developers, increasing Design System adoption across squads and reducing implementation errors through best practices that are applicable to modern React projects.
- Supported squads by developing temporary components to meet urgent business needs—accelerating

delivery by up to 30% while adhering to responsive design and accessibility best practices.

- Served as a reference point for frontend best practices, bridging design and development, and streamlining workflows in a manner consistent with modern React development methodologies.

Frontend Developer

March 2023 – May 2024

Dione, Brazil, Remote

- Delivered scalable and maintainable front-end solutions using HTML5, CSS3, and JavaScript, enabling faster feature development while adhering to modern development practices akin to React.js projects.
- Mentored a team of 5 junior developers, enhancing code review processes and reducing bug reports by 15% within 6 months, with a focus on applying best practices from React and Agile Methodology.
- Engineered front-end solutions for digital products that prioritized responsive design, component lifecycle management, and performance optimization, ensuring seamless integration with backend APIs.
- Guided team members in adopting coding standards and design principles that support modular, reusable code consistent with React best practices.

Frontend Developer & UI/UX

January 2018 – May 2023

UFPE, Brazil, Hybrid

- Worked on a partnership project with Reciprev as a UFPE scholar, contributing to front-end development and web design.
- Developed interactive and responsive user interfaces using HTML, CSS, and JavaScript.
- Applied best design practices to ensure usability, accessibility, and performance.
- Designed and implemented UX strategies to enhance overall user experience.

Frontend Developer

June 2021 – February 2023

Avanade, Brazil, Hybrid

- Used SAPUI5 to develop robust enterprise applications.
- Applied SAP Fiori principles for usability testing and user experience improvements.
- Implemented DevOps practices to ensure quality, efficiency, and reliability in the development process.

Frontend Developer

January 2021 – June 2021

Tascom – Tecnologia em Saúde, Brazil, On-site

- Worked as a junior developer at TASCUM Informática, using ReactJS to build user interfaces.
- Applied agile methodologies and managed tasks using Kanban with tools such as Trello.
- Created UI and UX designs using Photoshop and Figma.

Frontend Developer & UI/UX

June 2020 – January

2021

HAUT – Incorporadora Design, Brazil, On-site

- Gained hands-on experience in ReactJS development during internship at HAUT.
- Developed prototypes using Figma to support interface design and validation.
- Applied UI and UX principles to create intuitive and visually appealing user interfaces.

EDUCATION

Bachelor's Degree in Information Systems

2020– 2024

Federal University of Pernambuco (UFPE)

OTHER CERTIFICATES

Introduction to Information Technology

January 22, 2018

Data Modeling

January 21, 2018

Basic Excel

August 30, 2017
